

# Group #6

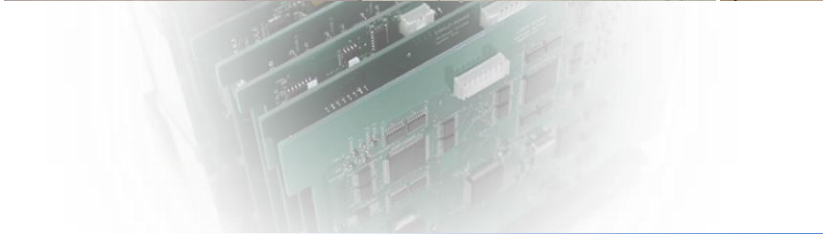

## CanSat Activities in UNISEC

Moderator: Ryusuke Konishi (Keio university)

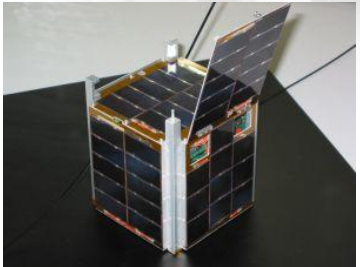

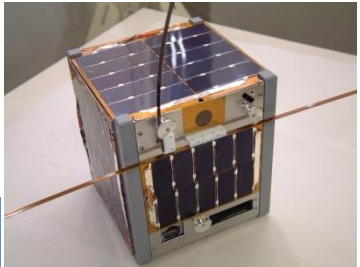

Assistant: Kentaro Nishi (Tokyo Metropolitan University)

*CanSat and Rocket experiment('99~)*

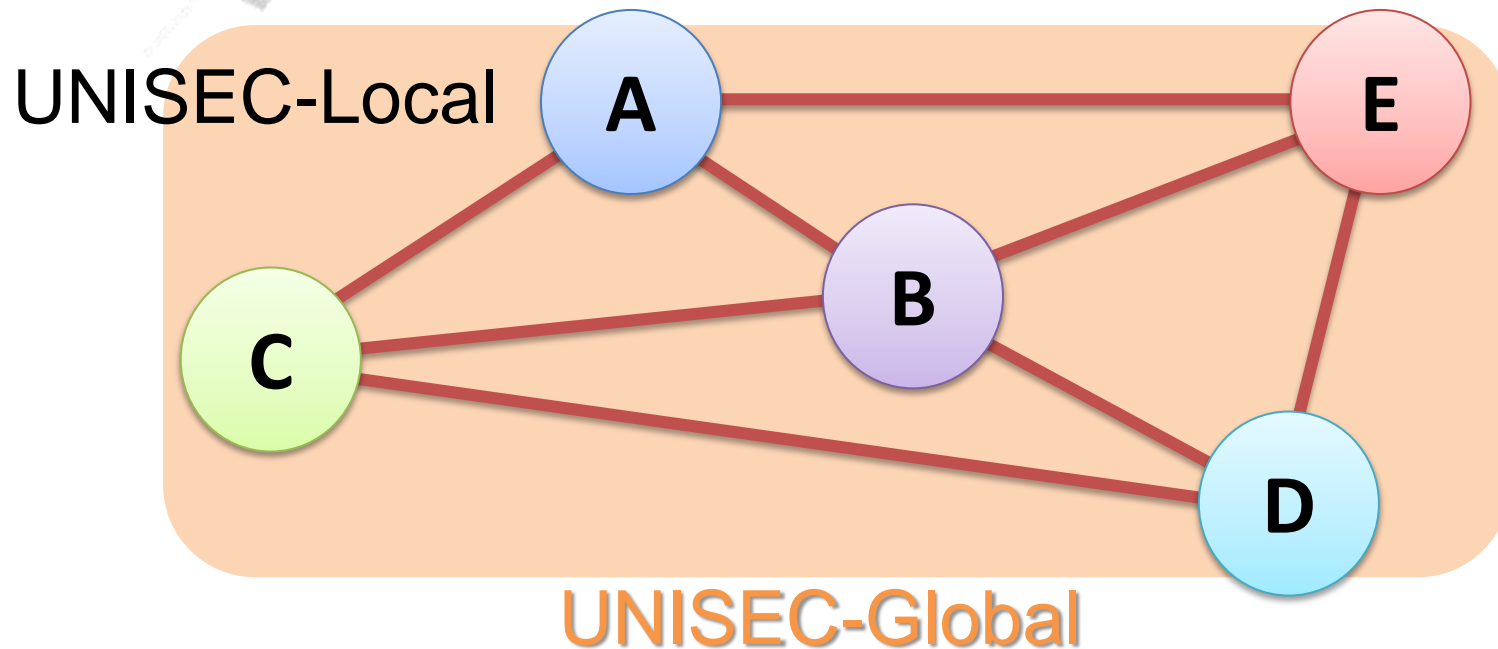

*Cubesat Development('03~)*

# Background

- We'll have a great framework, "UNISEC-Global"
- This framework will be useful when we work on CanSat activities
- Not only domestic, But also international activities

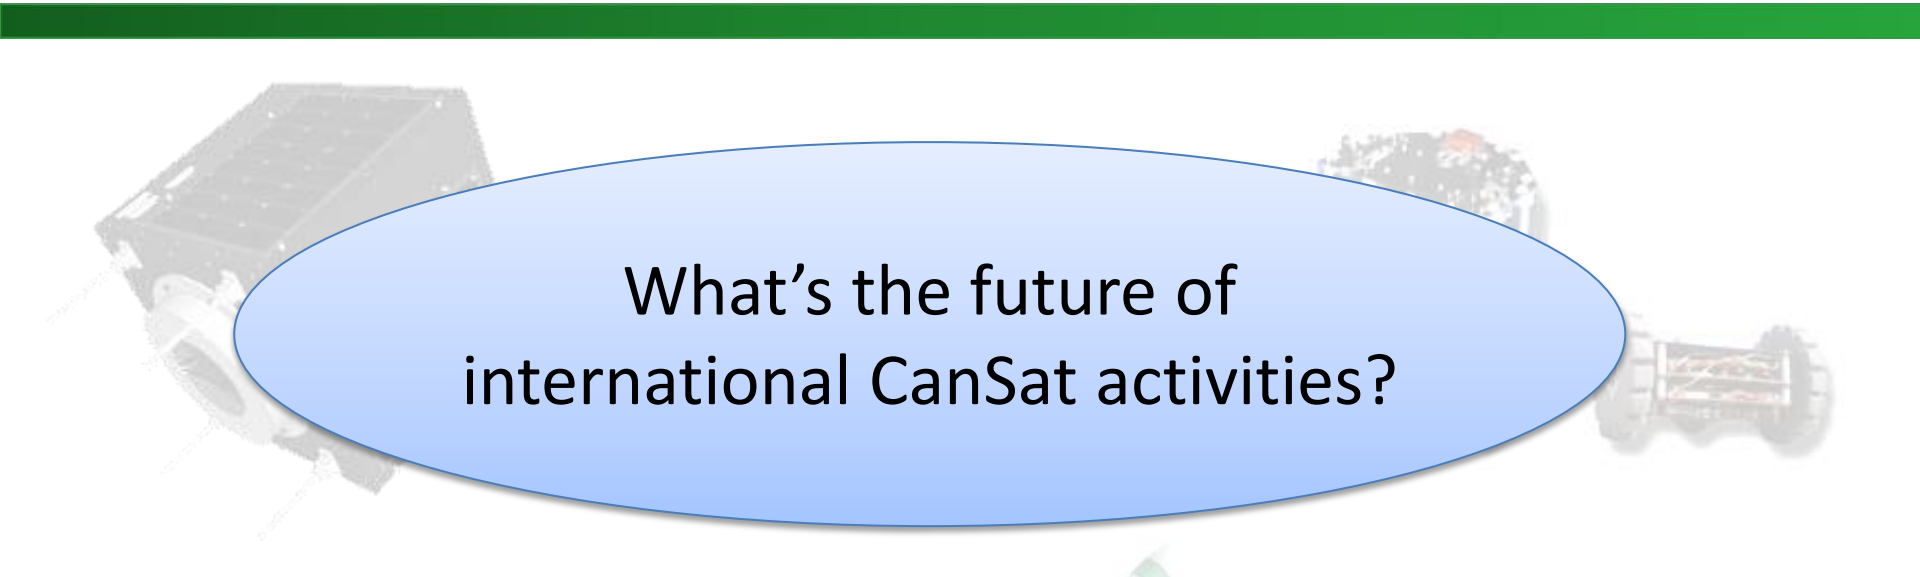

# Examples of international activities

- CanSat Leader Training Program, CLTP
  - People from several countries can learn skills for CanSat
- ARLISS (A Rocket Launch for International Student Satellites)
  - International CanSat competition
    - Comeback Competition
    - Mission Competition

# Motivation

What's the future of international CanSat activities?

How can every countries get profits?

# Goal of the discussion

- Development of a basis of the Roadmap for International CanSat activities utilizing the framework of UNISEC-Global

## Roadmap for international CanSat Activity

General Assembly from all over the world

Promoting of Global Information Sharing System

Formulation of the rule for international CanSat

# Today's output

- Make a basis of the Roadmap

## Roadmap for international CanSat Activity

General Assembly from all over the world

Global Information System

Formulation of the rule for international CanSat

- Pick up one of projects and plan the detail
