Abstract Due on 31 May, 2016

The 7th Nano-satellite Symposium's theme is "Micro/nano/pico Satellites: Innovations in Architecture, Technologies and Players." It is a forum where many engineers, researchers, scientists, students, users and business persons from all over the world discuss together to further enlarge and strengthen the micro/nano/pico-satellite community.

The agenda for the 4th UNISEC-Global Meeting includes reports from Local Chapters; acknowledgment of new Local Chapters; a forum for UNISON-Global (student organization); and discussion of new aspects of space science and engineering.

During the meeting, the 4th Mission Idea Contest (MIC4) will be held on the basis of the discussion at the previous workshop. In parallel with MIC4, a new category of "Deorbit Device Competition (DDC)" will also be hosted to contribute to the harmonious development of outer space.

In collaboration with

International Academy of Astronautics (IAA)

Co-hosted by

İTÜ
