

Group 5: Collaborators Meeting for New Ground Station Network Experiment

Infostellar^{inc}

Key Points

- Share information about each country's current status on ground station systems
- Overview of ongoing Infostellar ground station network project BIRDS
- Setting up targets for next ground station network experiment
- Discussion results and proposals

Infrastructure

Istanbul Technical University
USTTL Ground Station Antennas

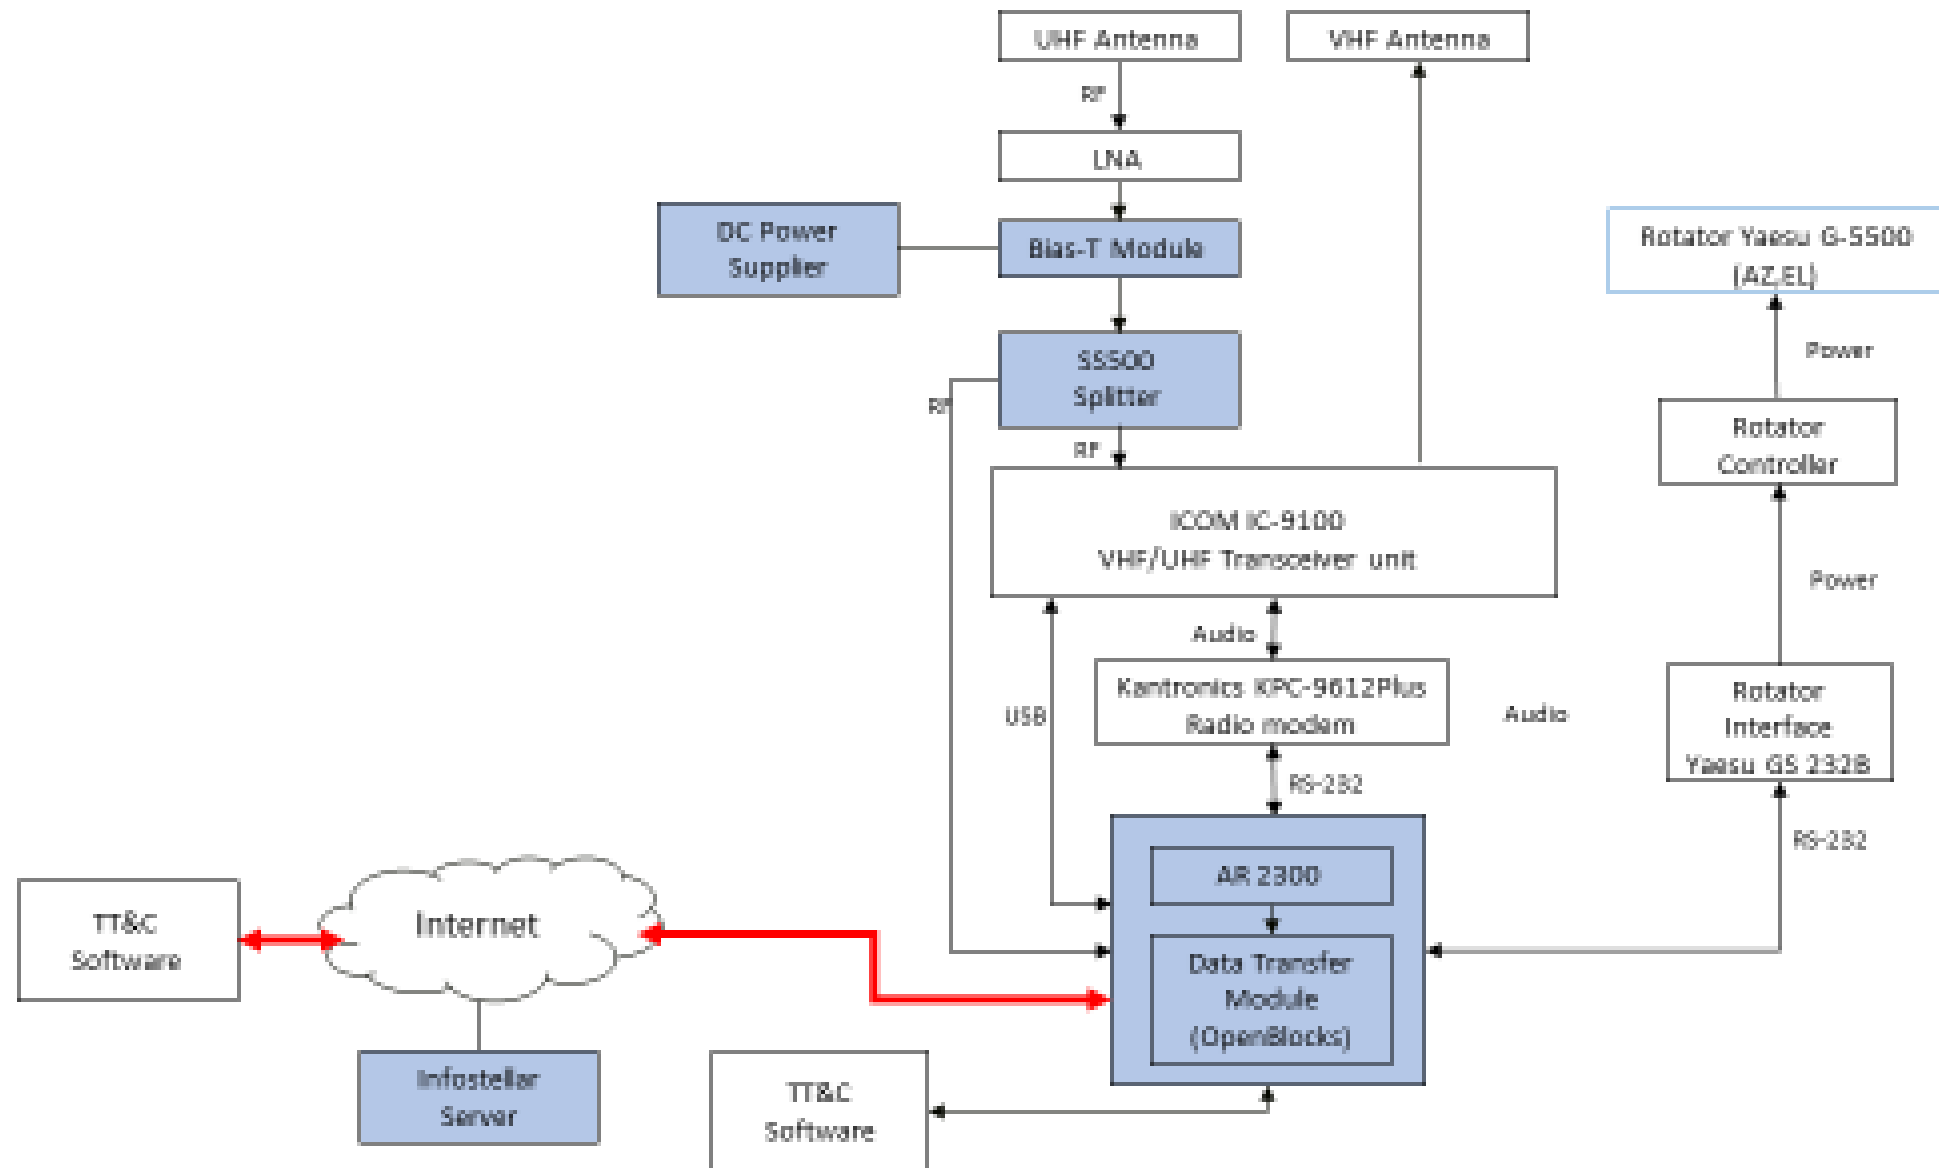

Kyushu Institute of Technology
Ground Station Antennas

Infostellar Module

BIRDS experiment configuration

Proposals

- Integrate Istanbul Technical University USTTL Ground Station to the Infostellar ground station network experiment
- Propose to build a ground station in Mexico to be integrated with the Infostellar ground station network experiment
- Define a priority criteria for scheduling uplink/downlink data for overlapping passes between satellites (next experiment)

Thank you!!
