Call for Idea: 8th Mission Idea Contest

Missions by multiple nano-satellites

- The requirement is that the mission is carried out by multiple satellites made of **6U CubeSat or smaller each**.
- The number of satellites can be anything as long as it is bigger than one and the mission has clear benefits of having multiple satellites in orbit at the same time.
- Constellation (with no inter-satellite link) missions and formation missions (with inter-satellite link) are both encouraged.
- Schedule and venue: Fall in 2022, Turkey (TBD)

Congruent systems among UNISEC Local Chapters

- UNISEC (Japan) was established in 2002 and obtained a legal status in 2003. Since then, how UNISEC-Japan could survive for 20 years?
- Operation systems and knowhow, and philosophy behind them will be shared.
- Looking for local chapters that voluntarily will work on it together with UNISEC-Japan.
