

# Student CanSat Training and Launching Program in the Philippines

Stephanie Tumampas

*Regulus Spacetech Inc  
University of the Philippines*

# OVERVIEW

- The Philippines has a growing community of enthusiasts in astronomy and space science, particularly space science exploration.
- The Philippines doesn't have a concrete space science curriculum in the country.
- Philippines needs people to be engaged in space science technology and exploration as it will benefit the country.

# Dr. Rogel Mari Sese

- *Point of Contact for UNISEC-Global*
- *Focal Person for the Space Science Education Program*
- *Member of the International Astronomical Union*
- *Assistant Professor at the University of the Philippines Los Baños*

# What to do?

1

- The program will be offered to high school and university students at the start of the school year (June).

2

- The program will have a preliminary stage which will include trainings, lectures, workshops and actual assembly of CanSat.

3

- The next stage of the program will be the competition stage where assembled CanSatellites will be launched. This part will also culminate the program.

# TIME FRAME (2014)

JAN

- PLANNING

FEB

- PLANNING and INVITATIONS to SCHOOLS

MAR

- PLANNING

APR

- MODULE MAKING and BRIEFING of LECTURERS

MAY

- FINAL PREPARATIONS

JUN

- START of TRAININGS AND WORKSHOPS

JULY

- TRAININGS and WORKSHOPS

AUG

- TRAININGS and WORKSHOPS

SEP

- TRAININGS and WORKSHOPS

OCT

- ACTUAL ASSEMBLY OF CANSATS

NOV

- CULMINATION OF WORKSHOP

DEC

- EVALUATION

# What will students learn or benefit?

- Instrumentation techniques
- Advanced Programming
- Electronics
- Major field of research or interest
- Future target jobs that would interest them as well as a gain for the research and development industry in the Philippines.

A word cloud featuring various programming languages and technologies. The most prominent words are C++, C#, and Delphi. Other visible words include Java, JavaScript, Python, Objective-C, Ruby, Perl, PHP5, Action Script, VB.NET, Visual Basic 6, Visual FoxPro 6, Gambas, Clarion, D, Ada, Magik, Oz, Harbour, Vaia, R, Eiffel, ABL, XBase++, ABAP, and AJAX.

# What are the major benefits?

- On a national scale, it would greatly benefit in different areas which address the immediate problems of the country. These areas include:

Advanced Education

Forestry

Disaster and Risk  
Management

Agriculture

Weather and Climate

**THANK YOU!**
