DISCOVERY

in silico Discovery		Screening		Hit to Lead
Target Based	Ligand Based	Whole Cell Based	Target based	
<ul style="list-style-type: none"> Rv0129c (Ag85C) Rv2753c (dapA) Rv2773c (dapB) Rv1018c (glmU) Rv0548c (menB) Rv055c (menC) Rv0014c (pknB) Rv1258c FAAD's MbtA 	<p>Large scale data mining to identify phytomolecules with anti-tubercular properties</p> <p>Generation and optimisation of Anti-TB models from Pubchem bioassay datasets</p> <p>Virtual screening of compound libraries</p> <p>Systems level pharmacophore modeling</p> <p>Prediction of :</p> <ul style="list-style-type: none"> Anti-bacterials based on docking energy scores CP450 for drug metabolism Binding affinity of ketoxazole derivatives against FAAH Mtb inhibitors using QSAR and docking strategies Compilation and creation of datasets from PDB 	<p>Screening of 20,000 drug like compounds from Chembridge Database (CSIR-IIIM)</p> <p>Screening of large number of in-house molecules and compounds submitted to OSDDChem (CSIR-CDRI)</p> <p>Substituted Aryl/Biaryl Triazoles and Quinoxalines as potential anti-tubercular agents *</p>	<ul style="list-style-type: none"> Rv1018c (glmU) Rv2753c (dapA) Rv2773c (dapB) Rv0548c (menB) Rv055c (menC) Rv3014c (NAD Dependent DNA Ligase) Rv3290c (Lysine ε Aminotransferase) Rv0410c (Serine Threonine Kinase) Rv1837c (Malate Synthase) Rv1258c FAAD's MbtA 	<p>Thiophene containing trisubstituted methanes CDRI-SOO6-830 (CSIR-CDRI)</p> <p>LAMS (CSIR-IGIB and Jubilant Chemsys)</p>

* Planned activity

OSDD PROJECTS : Drug Delivery /Diagnostics/ Immunotherapy

- ▶ Small molecule mediated immunotherapy
- ▶ Improved chemical entities as anti-tubercular agents targeting the respiratory pathway of organism through co-crystal engineering
- ▶ Integrated optics approach to non-invasive medical diagnostics
- ▶ Transcript profiling of macrophages exposed to TB drugs and drug microparticles
- ▶ Regression of the growth of *M.tuberculosis* by lipidated promiscuous peptide
- ▶ Nanoparticle based drug delivery system for Isoniazid
- ▶ Validating potential protein-protein interactions of *M.tuberculosis* H37Rv utilizing M-PFC

Open source

From Wikipedia, the free encyclopedia

open source as a [philosophy](#) promotes a universal access via [free license](#) to a product's design or blueprint, and b) universal redistribution of that design or blueprint, including subsequent improvements to it by anyone.

Open source

From Wikipedia, the free encyclopedia

open source as a philosophy promotes a **universal access** via free license to a **product's design or blueprint**, and b) **universal redistribution of that design or blueprint**, including subsequent improvements to it by anyone.

Open Source Appropriate Technology

From Wikipedia, the free encyclopedia

Open-source-appropriate technology (OSAT) refers to "[appropriate technology](#)" (technology that is designed with special consideration to the environmental, ethical, cultural, social, political, and economical aspects of the community it is intended for) that are designed in the same fashion as free and open-source software; that is, developed in the open and licensed in such a way as to allow their designs to be used, modified and distributed freely.^[1]

Open Source Appropriate Technology

From Wikipedia, the free encyclopedia

Open-source-appropriate technology (OSAT) refers to "[appropriate technology](#)" (technology that is designed with **special consideration** to the **environmental**, **ethical**, **cultural**, **social**, **political**, and **economical aspects** of the community it is intended for) that are designed **in the same fashion as free and open-source software**; that is, developed in the open and licensed in such a way as to allow their designs to be used, modified and distributed freely.^[1]

**1. Introduce yourself in
3 phrases.
[2 mins]**

2. Share your story with Open-Source. [10 min]

3. How can we **share**,
collaborate and
accelerate low-cost
space exploration in an
open-source format?
[Open Brainstorming]

Thank you! :)
