

# ABSTRACT

Commercial Space Sector

New Space

Solution: Asia-Pacific Undergraduate CubeSat Initiative

# SPACE EDUCATION FOR ALL WORKING GROUP (SE4AWG)

- Water Rocket Event for Education (12~16 years old)
- Poster Contest for Young People (8~11 year old)
- Space Education Seminars / Workshops for Teachers
- CanSat for Students
- CubeSat for Students and Satellite Educators (disseminating information)
- Social Media Usage

Higher Education

# SPACE EDUCATION FOR ALL WORKING GROUP (SE4AWG)

25th SE4AWG Report

"ensure continuous engagement of students in preparation for their space-related careers (Sese, 2018)."

27th APRSAF Joint Statement

higher education

practical education

# SPACE EDUCATION FOR ALL WORKING GROUP (SE4AWG)

APRSAF:

Continuous Engagement

Higher Education

Practical Education

#### **Better ways?**

- high-quality hands-on experience (Holstermann, 2010)
- connect students with the industry (Alnajjar, 2020)

## UNDERGRADUATE CUBESAT

#### SUCCESSFUL CASES

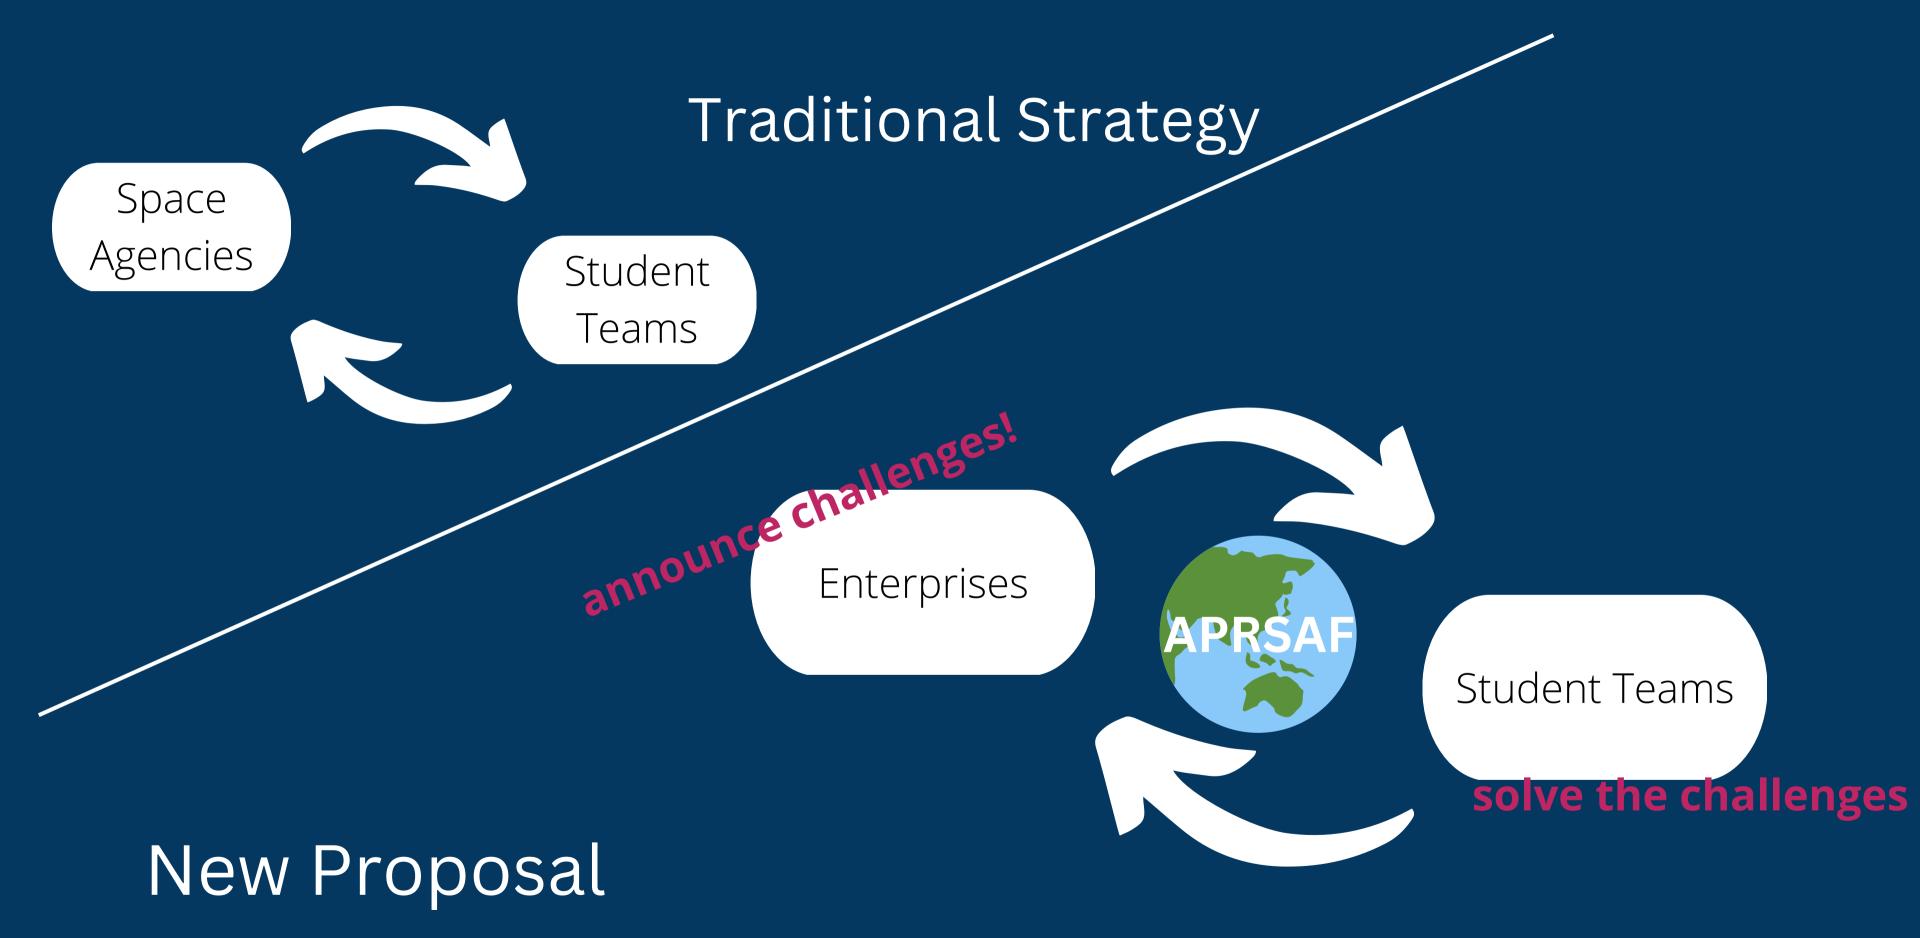

- United States of America (Hill, 2022)
- Indonesia (Prahyang, 2018)
- New Zealand (Aglietti, 2020)
- Singapore (Lim, 2015)

guaranteed funding at each step of the CubeSat design lifecycle.

#### **FUNDING IN TAIWAN**

 The CubeSat Mission Design Contest (CMDC) by National Space Organization (NSPO):

US\$3500 in total.

#### OBJECTIVES

- Give undergraduates in the Asia-Pacific region the opportunity to develop their CubeSats with essential funds
- Advance interdisciplinary collaboration between students and businesses from different backgrounds
- Reinforce the cohesion of the community and strengthen information exchange

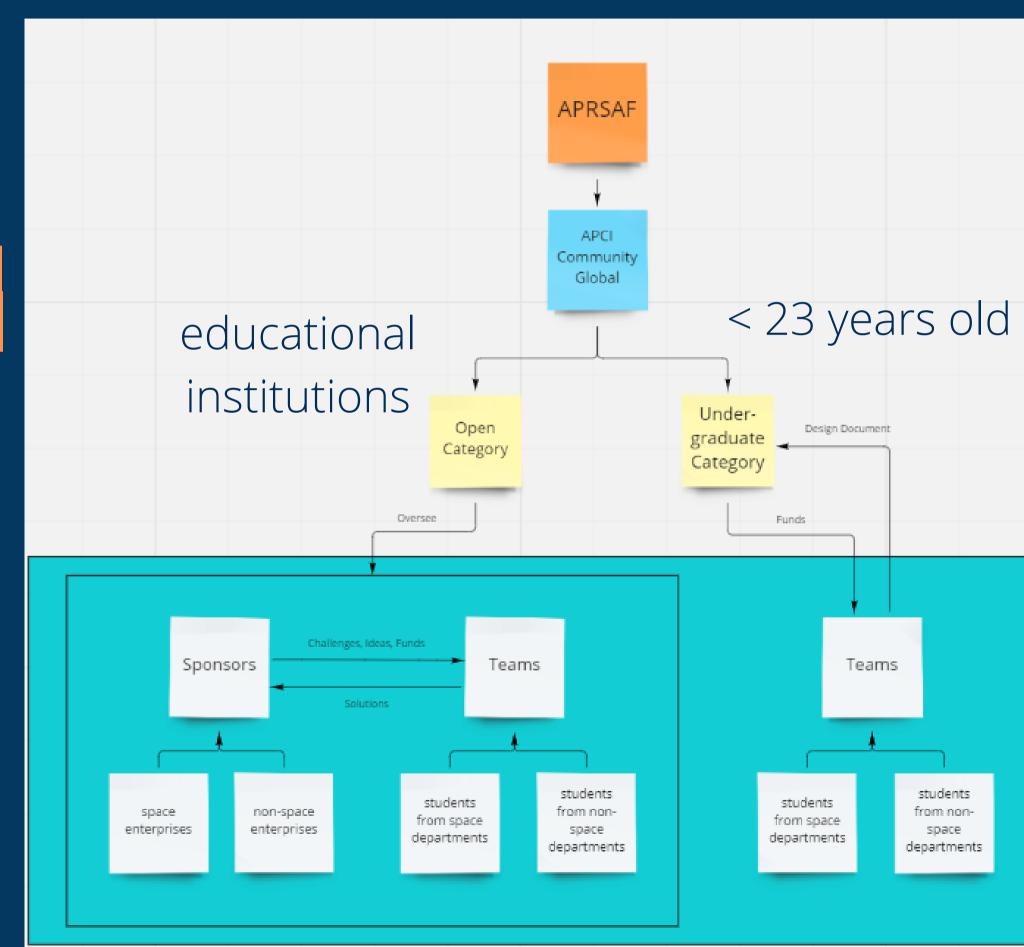

## APCI CATEGOIRES AND THEMES

APCI community: not mandatory

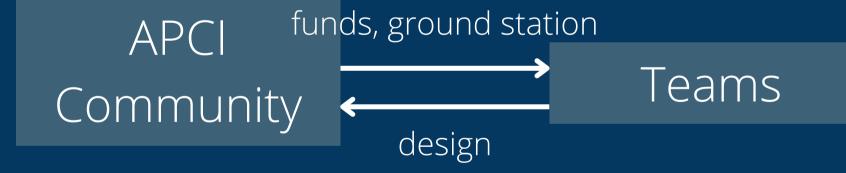

Applicant eligibility: Both categories accept only applicants from the APCI participating countries and regions.

Evaluation criteria will be set by the committee selected from the APCI community.

## UNDERGRADUATE

- 1. Teams submit application
- 2. Competition

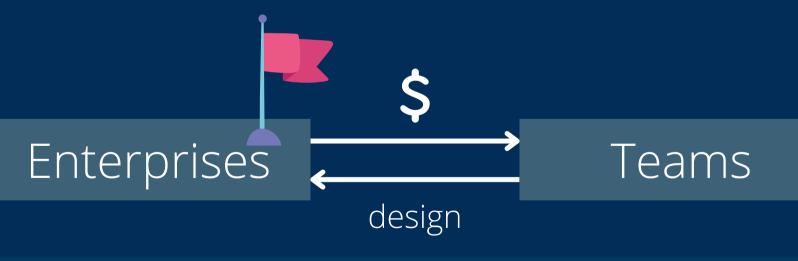

## **OPEN**

- 1. Enterprises announce challenges
- 2. Competition
- 3. Pairing

APCI: middleman

paring, intellectual property negotiation, technology transfer

- CubeSat design sharing
- free-of-charge ground stations

# SOCIAL RETURN

# Students

- INSPIRE THE NEXT GENERATION
- DIMINISH BARRIERS BETWEEN DEPARTMENTS
- INTERNATIONAL COLLABORATION IN THE FUTURE

# Enterprises

 SPACE TECHNOLOGY IN DIFFERENT DOMAINS

90% SCIENTISTS SURVEYED: MANNED SPACE EXPLORATION INSPIRED YOUNGER GENERATIONS TO STUDY SCIENCE (MONASTERSKY, 2009).

# SOCIAL RETURN

# Nations

- REDUCE LEARNING BARRIER
- LOWER R&D COST

# APRSAF

- INFORMATION EXCHANGE
- MORE INFLUENTIAL REGIONAL BODY

# CASES (OPEN CAT.)

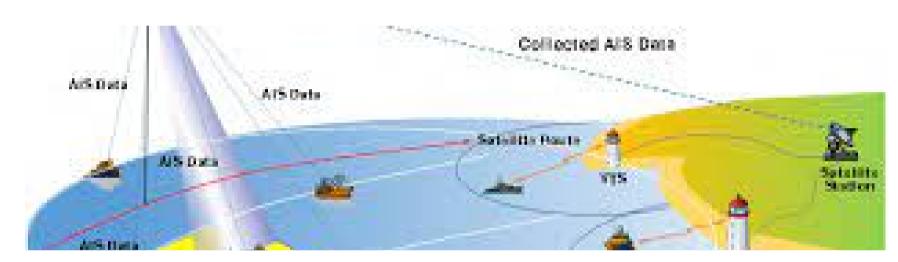

Figure 1. Operation Concept of S-AIS System for KOMPSAT-6. Copyright (c) IARIA, 2016.

#### **AUTOMATIC IDENTIFICATION SYSTEM**

Shipping agencies wondered: "We want to track our boats when they are not near the shore, can satellites help us with this?"

Figure 2.Celetis Space Burial ©1994-2022 Celestis, Inc.

#### **SPACE BURIAL**

Traditional funerary services asked: "We want to expand our business to space burial. The offsprings want to see the urn displayed with Earth as background so that they can pay respect. Can someone help us design the CubeSats needed?"

## CONCLUSION

a feasible mechanism to:

- benefit APRSAF
- promote academia-industry partnership
- attract funding linked to other technologies

Ensure continuous engagement of students in preparation for their space related careers

Interdisciplinary cooperation

Commercial application
