

Message from Vincent Kessler (CEO of Synspective SG)

Satellite data creates real value when it is used to address challenges on the ground. Through this competition, we hope you will explore the unique strengths of SAR imagery—observing the Earth day and night, in any weather—and develop bold, practical solutions for the Asia-Pacific region.

The selected team(s) will receive StriX high-resolution SAR satellite imagery, including archived data and new observation opportunities tailored to their project.

We look forward to seeing your ideas grow into services that make our societies more resilient and sustainable. Be creative, be ambitious—and show us what becomes possible when your vision meets the power of satellite data.

Vincent Kessler
CEO, Synspective SG Pte. Ltd.

Prize: StriX High-Resolution SAR Satellite Imagery Data Usage Rights

The selected team(s) will be awarded StriX high-resolution SAR satellite imagery data, tailored to their project's requirements.

- This prize includes 2 archived images and 2 new imaging (tasking) requests.
- The area of interest and observation timing will be determined based on the specific needs and nature of the winning project.

✂The distribution and usage of the imagery data will be subject to Synspective's standard data policy and End-User License Agreement (EULA). The imagery data is provided under a license for use only and is not sold.

Note: The award may not be granted if no project meets the selection criteria.
