

9th UNISEC-Global Meeting

Earth Observation Forefront - Hands-on Workshop

Date: November 30 14:00~ (X-Nihonbashi)

Join us on our remote-sensing adventure!

This workshop is for those who are interested in working with data through the integration of Earth science and technology, using software in hands-on training.

Remote sensing is an innovative way to explore aspects of the Earth using optical satellites like GRUS, various series of SAR satellites, drones, sensors, and data analysis.
