Pre-8th Mission Idea Contest (PreMIC8)

Missions by multiple nano-satellites

- MIC8 will be held in 2023.
- In 2022, we encourage to organize regional competitions.
- Pre-MIC8 workshop will be held in Istanbul (or virtually) in October 2022. Announcement will be made soon.
- The requirement is that the mission is carried out by multiple satellites made of **6U CubeSat or smaller each**.
- The number of satellites can be anything as long as it is bigger than one and the mission has clear benefits of having multiple satellites in orbit at the same time.
- Constellation (with no inter-satellite link) missions and formation missions (with inter-satellite link) are both encouraged.

Launch opportunities (ISS deployment)

- J-CUBE
 - Special (discounted) launch opportunities (1U-3U)
 - Need to collaborate with UNISEC-Japan's university
 - Matching application deadline: October 31, 2022
