

# Space Talent Incubation in Taiwan

Jyh-Ching Juang

Coordinator, UNISEC TAIWAN

Professor, Department of Electrical Engineering

National Cheng Kung University, Taiwan

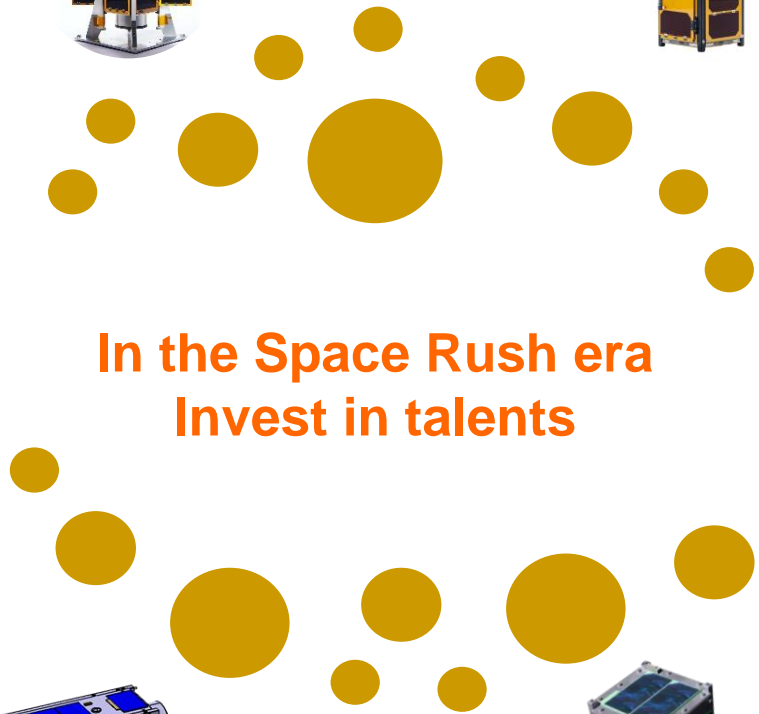

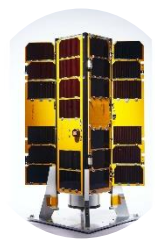

# New Space Era

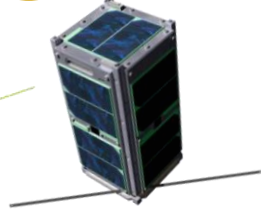

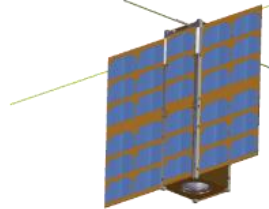

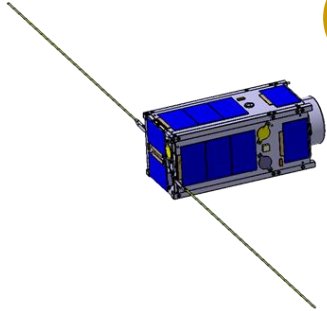

## New space era

- ⊕ Cost-effective and reliable ways to deploy constellations of spacecraft.
- ⊕ New user terminal technology that allows satellite-based service on the move.
- ⊕ Systems technology that enables satellite constellations to co-exist and inter-operable.
- ⊕ Advanced manufacturing techniques for mass production at low cost, but with high quality and reliability.
- ⊕ Digital resilience and cybersecurity become differentiators.
- ⊕ Innovative business model and entrepreneurial spirit.

 Talented human resources are key for sustainable development of space technology and business

**In the Space Rush era  
Invest in talents**

# Holistic Approach
