

67th Virtual UNISEC-Global Meeting

Hosted by  **UNISEC** GLOBAL
University Space Engineering Consortium

Guest Lecture: “Decision-focused Engineering in an AI-Accelerated World”

Date: April 18, 2026 Time: 22:00-24:00(JST)

Opening Remarks

Hiraku Sakamoto,
Institute of Science
Tokyo

Moderator

Fatimah Zaharah Ali
Universiti Teknologi MARA
(UiTM)

REGISTER NOW

Guest Lecture

Dr. Jerry Jon Sellers

Teaching Science & Technology Inc.

Implications for Systems Engineers, Chief Engineers, and Program Teams

Lecture Theme

“Decision-focused Engineering in an AI-Accelerated World”

- ◆ Artificial intelligence is now part of everyday engineering work.
- ◆ Across the space and aerospace sector, teams are already using AI.
- ◆ The pace of engineering work is increasing.
- ◆ The number of options available to teams is increasing.
- ◆ But the fundamental responsibility for program outcomes has not changed.
 - There’s no escaping the “systems engineering universe” that must balance cost, schedule, performance and risk
